

Sphero Challenge Four

Start by pairing your Sphero with an iPad by going into the Sphero Edu app and pairing.

Open the app and start a new project.

Challenge Four

Using the things around you (books, etc) create an obstacle course for your Sphero to drive through. Make sure there are at least three turns in the obstacle course. At the end of the course, make a little "goal" for your Sphero to go into.

Now, write code that causes your Sphero to navigate through the maze and into the goal at the end! If you can do it forwards, try it backwards!
