

Sphero Challenge 1: Drive Mode

| Instructions | Checkmark when done | |
|--|---|--|
| <ul style="list-style-type: none"> Bring both an ipad or chromebook and the shero together and keep them close so that the app recognizes the correct Sphero. | | |
| <ul style="list-style-type: none"> Find the Sphero EDU app Click on Sign In <ul style="list-style-type: none"> Username: Password: |  | |
| <ul style="list-style-type: none"> Place Sphero on the ground Connect to Sphero (make sure the bluetooth is on) | | |
| <ul style="list-style-type: none"> Click on the Drive Mode |  | |
| <ul style="list-style-type: none"> AIM THIS IS A VERY IMPORTANT STEP <ul style="list-style-type: none"> Touch and hold the AIM symbol You will see that Sphero has a blue tail light While holding AIM, rotate your finger until the blue light points towards you. Sphero moves away from the blue light. Note: You can use the AIM button at any time to readjust the heading at any time. |  | |
| <ul style="list-style-type: none"> Drive Sphero around the classroom by moving the Blue dot in the gray circle <ul style="list-style-type: none"> Try not to hit anything in the classroom! |  | |
| <ul style="list-style-type: none"> Change Sphero's color by moving the white circle in the color wheel Change Sphero's Speed by adding or removing the blue bars under the color wheel. |  | |

Sphero Challenge 2: Program

| Instructions | Checkmark when done |
|--|---------------------|
| <ul style="list-style-type: none"> ● Create a new program to make your sphero roll forward <ul style="list-style-type: none"> ○ Click on Programs  then + (round green + symbol) ○ Change the name of your program to divXX names. ○ Make sure Block is selected, click Create. ○ This will open the programming interface. | |
| <ul style="list-style-type: none"> ● Click on the Actions  category (at the bottom left of the interface) ● Drag a Roll block  to the canvas (program area) ● It will look like this command line:  | |
| <p>There are 3 values you can edit:</p> <ul style="list-style-type: none"> ● First one = the duration = how long you want the sphero to roll for, in seconds. <ul style="list-style-type: none"> ○ Click on it and change it to 2 seconds. ● 2nd one = speed = how fast sphero is moving. <ul style="list-style-type: none"> ○ Click on it and choose a speed of 50 using the speed slider (or you can click on the number and input the number directly). ● 3rd one = heading = the angle you want Sphero to roll at. <ul style="list-style-type: none"> ○ Click on it and choose 0 degrees (either by rotating the arrow, or click on the number at the center and change it). | |
| <p>Try to run your program... after orienting Sphero in the right direction!</p> <ul style="list-style-type: none"> ● Place the sphero on the ground. ● Click on the aim icon and make sure the blue tail light on the sphero faces you. ● Click start  | |
| <p>Make a program so that the sphero move forward, change color, then move back to you (backward).</p> <ul style="list-style-type: none"> ○ Roll (seconds, speed-40, heading) ○ Set color ○ Roll (seconds, speed, heading) to come back <p>*** Double tap a command for help on the command *** to delete a command, press on it, drag to the trash at the top</p> | |

Sphero Challenge 3: Travel a square

| Instructions | Checkmark when done |
|---|---------------------|
| <ul style="list-style-type: none"> • Create a new program to make sphero travel a square. • Add in colour and sound effects <div data-bbox="750 478 891 630" style="text-align: center;">  </div> <ul style="list-style-type: none"> • You will need to add Delay blocks found in the Controls category <p data-bbox="358 667 459 695">Controls</p> <p data-bbox="526 680 1300 751">after each Roll commands so Sphero stops and has enough time to change direction. The delay should be of 1 second.</p> | |
| <ul style="list-style-type: none"> • Once you are done, try making a triangle or another shape for bonus points! | |

Sphero Challenge 4: Travel a Path

| Instructions | Checkmark when done |
|---|---------------------|
| <ul style="list-style-type: none"> • Create a 4 to 6 leg path using masking tape, for another group to program their sphero so that their sphero follow the path you created. | |
| <ul style="list-style-type: none"> • Once you are done, try going through the path faster by changing values in your program! | |

Sphero Challenge 5: Sphero Dance

| Instructions | Checkmark when done |
|--|---------------------|
| <ul style="list-style-type: none"> • Create a program to make sphero “dance” without stopping. Include light effects. Dance party in the dark at the end of the class! | |

Sphero Challenge 6: Light/Sound Show

| Instructions | Checkmark when done |
|--|---------------------|
| <ul style="list-style-type: none">● Create a program to make sphero do a light/sound show, continuously, with alternating “happy” and “scary” effects. Light/sound show in the dark at the end of the class!<ul style="list-style-type: none">○ Do a sequence of 3 happy effects, 2 times○ Do a sequence of 3 scary effects, 2 times○ Use loop | |

Sphero Challenge 7: Hot Potato

| Instructions | Checkmark when done |
|---|---------------------|
| <ul style="list-style-type: none">● Create a program to make sphero become a “hot potato”!<ol style="list-style-type: none">1. Make sphero “ding” and “flash” when it is tossed2. Add to that – make sphero turn red and play a sound after 5 tosses3. Add to that – make sphero turn red and play a sound after a random number of tosses4. Add to that – make sphero “vibrate” when the game is over5. Instead of counting number of tosses to determine game end, count a number of seconds, then a random number of seconds6. Like the games “catch phrase” and various others where timers are involved, to make it more exciting – make sphero start to blink or play different sounds to create a sense of urgency as the timer limit approaches. | |
